PROGRAM ACCOMPLISHMENTS: In 1981, the Department of Labor established new priorities and directions to strengthen the enforcement of ERISA, initiated a program of prudent deregulation, and undertook major efforts to reduce paperwork requirements. In the area of enforcement, investigations were broadened to include referrals of criminal evidence to the Department of Justice as well as pursuing civil violations, and greater emphasis was placed on correcting fiduciary violations. The Department closed 2,509 investigative cases in 1981, of which 1,346 were found to contain violations of ERISA. The Department also completed the first joint effort with the Internal Revenue Service to monitor compliance with two significant class exemptions in three major cities. In regulatory activity, the Department issued 7 final and 2 proposed rules in 1981, five dealing with simplifying or reducing paperwork requirements. Regarding paperwork, a task force was established to thoroughly examine all ERISA reporting and disclosure requirements and to recommend how these may be reduced and simplified. Also during 1981, the process of exemption from ERISA's prohibited transactions provisions functioned smoothly, as the Department closed 687 applications in an average of 4 months. In other activity, the Department assisted in restoring $2.8 million in denied benefits to participants; distributed 350,000 copies of publications explaining various provisions of ERISA; completed 11 studies covering various pension-related topics; responded to 75,000 inquiries from the public; disclosed 93,000 reports to the public; and received 855,000 annual reports.

This resulted in an estimated 2,136 complaints being investigated. OFCCP's field manual has received wide distribution and acceptance, establishing clear and consistent procedures to be followed in carrying out the compliance process. On September 30, 1980, OFCCP published in the Federal Register affirmative action goals and timetables for minority participation in the construction industry. The coverage is nationwide (a first in contract compliance history for minorities) and the goals were computed for two types of geographical units, the Standard Metropolitan Statistical Area (SMSA) and the Economic Area (EA). There are 285 SMSAs and 183 EAs in the United States. Nationwide goals and timetables for women were established during fiscal year 1978. Every nonexempt Federal and federally-assisted construction contracting firm in the United States is committed to an affirmative action goal for women and minorities in its total construction workforce. A higher quality compliance review, diminishes the total number of reviews completed. However, nearly 2,500 compliance reviews were completed in fiscal year 1980. OFCCP increased this activity in fiscal year 1981 to approximately 3,135 completed reviews.

(Federal Wage—Hour Laws)

FEDERAL AGENCY: WAGE AND HOUR DIVISION, EMPLOYMENT STANDARDS ADMINISTRATION, DEPARTMENT OF LABOR

AUTHORIZATION: Fair Labor Standards Act, Public Law 75-718, as amended, 29 U.S.C. 201-219; 29 CFR, Chapter V. Walsh-Healey Public Contracts Act, Public Law 74-846, as amended, 41 U.S.C. 35-45; 41 CFR 50-201 and 50-206; Service Contract Act of 1965, Public Law 89-286, as amended, 41 U.S.C. 351 et seq.; 29 CFR 4; Davis-Bacon Act, 40 U.S.C. 276a et seq., and 59 Related statutes with construction labor Standards provisions, 29 CFR 1,3,5; Contract Work Hours and Safety Standards Act, 40 U.S.C. 327 et seq.; Copeland Act, 18 U.S.C. 874 as amended 40 U.S.C. 276C; Clean Air Act, Public Law 95-95 as amended, 42 U.S,C. 7622, Section 322; Comprehensive Environmental Responsive, Compensation, and Liability Act, Public Law 96-510, 42 USC 9610, Section 110; Energy reorgaization Act, Public Law 95-601 as amended, 42 U.S.C. 5851, section 210; Federal Water Pollution Control Act, Public Law 92-500 as amended, 33 U.S.C. 1367, section 507; Safe Drinking Water Act, Public law 93-523 as amended, 42 U.S.C. 300 j-9(i), Section 1450(i); Solid Waste Disposal Act, Public Law 94-58 as amended, 42 U.S.C. 6971, Section 7001; Toxic Substances Control Act, Public Law 94-469 as amended, 15 U.S.C. 2622, Section 23. National Foundation on the Arts and Humanities Act of 1965, 20 U.S.C. 954(3) 29 CFR 505.

OBJECTIVES: To provide standards protecting wages of working persons by requiring a minimum hourly wage rate and overtime pay, or prevailing hourly wage rates, fringe benefits and overtime pay under the Government contract Acts. Additional standards apply to child labor, to protection of employees from discrimination for engagement in certain "whistleblower" activities and to wage payment standards for professional performers and related or supporting professional employees of productions assisted by grants from the National Endowments for the Arts and Humanities.

TYPES OF ASSISTANCE: Advisory Services and Counseling; Investigation of Complaints.

USES AND USE RESTRICTIONS: Federal wage and hour standards apply generally to employees engaged in interstate or foreign commerce or in the production of goods for such commerce or in enterprises so engaged. For covered employment the minimum hourly wage is $3.35 per hour (beginning January 1, 1981), with time and one-half required for hours worked over 40 in a work week. To the extent necessary to prevent curtailment of employment opportunity, certificates authorizing special minimum wage rates are issued for learners, handicapped workers, full-time students, student workers, and apprentices. Failure to comply with the child labor provisions of the Fair Labor Standards Act may result in an assessment of a civil money penalty not to exceed $1,000 for each violation. Employees of contractors performing on most federally financed or assisted construction projects, or providing services under contract to Federal agencies, are subject to special standards. These special standards require that employees receive no less than the wages and fringe benefits prevailing in the locality as determined by the Secretary of Labor, and that overtime compensation after 8 hours a day or 40 hours a week be paid. The standards apply to performance on direct Federal contracts and also to most construction projects financed in whole or in part by the Federal Government (e.g., projects under the State and Local Fiscal Assistance Act of 1972 and National Housing Act). For Federal and federally assisted construction contracts over $2,000 and Federal service contracts over $2,500 subject to prevailing wage requirements, contracting agencies must request a wage determination from the Wage and Hour Division. Employees working on Federal contracts in excess of $10,000 calling for the manufacture or furnishing of supplies are required to be paid not less than the Federal minimum wage and overtime pay after 8 hours a day or 40 hours a week. An employee is protected from discharge or other forms of discrimination under the so-called "whistleblower" provisions of several environmental impact laws, where the employee testifies in or otherwise assists a proceeding or other investigation of a violation of one of these statutes. A protected employee may obtain reinstatement to the former position and/or other forms of redress. Labor standards are set under the Arts and Humanities Act which require the payment of the prevailing minimum compensation as determined by the Secretary of Labor to each of the professional performers or supporting professional personnel who work on projects or productions assisted by grants from the National Endowments for the Arts and Humanities.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Any covered employee, unless specifically exempt, is entitled to be paid in accordance with applicable monetary standards in the United States, District of Columbia, Puerto Rico, Virgin Islands, American Samoa, Guam, Wake Island, Eniwetok Atoll, Kwajalein Atoll, Johnston Island, and the Outer Continental Shelf Lands defined in the Outer Continental Shelf Lands Act. (Geographic application varies under the respective statutes and eligibility is dependent upon specific statutory language). For U.S. supply contracts over $10,000, contractor must be eligible as a manufacturer or regular dealer (41 CFR 50-201.101).

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: Not applicable.

Unless otherwise authorized, the names of persons making inquiries are kept confidential to the maximum extent possible under existing law. For Federal construction contracts or Federal service contracts subject to prevailing wage requirements, the contracting agency must request a wage determination from the Wage and Hour Division. The wage determination must be furnished to bidders and is made a part of the contract along with certain contract stipulations.

Award Procedure: Not applicable.

Deadlines: For most of the Acts, 2 year statute of limitations applies to the recovery of back wages; in the case of willful violations a 3 year limitation applies. A 30 day time limit applies to the filing of complaints and subsequent period for completing the investigation under the whistleblower statutes.

Range of Approval/Disapproval Time: Not applicable.

The order must be issued by a court of competent jurisdiction or in accordance with an administrative procedure, which is established by State law, which affords substantial due process, and which is subject to judicial review. In addition, garnishments issued under the laws of any State may be exempted from the operation of the Federal law where the Secretary of Labor determines that such laws provide substantially similar restrictions. DEPARTMENT OF STATE

OFFICE OF THE LEGAL ADVISOR

19.200 CLAIMS AGAINST FOREIGN GOVERNMENTS

(International Claims)

FEDERAL AGENCY: OFFICE OF THE LEGAL ADVISER, DEPARTMENT OF STATE

AUTHORIZATION: Authority to act is based upon the powers and duties delegated to the President under Section 3 of Article II of the Constitution of the United States and therefrom to the Secretary of State. There is no statute.

OBJECTIVES: To obtain settlements of all legally valid claims of nationals of the United States against foreign governments. A claim may result from any one of a number of situations in which a national of the United States may be injured by a foreign government in violation of international law. It can, for example, be based upon a taking of property without payment of prompt, adequate and effective compensation; other acts or omissions of governmental organs incompatible with international obligations; acts of individuals, insurgents and mobs under circumstances establishing a lack of due diligence on the part of government officials, etc.

TYPES OF ASSISTANCE: Provision of Specialized Services.

USES AND USE RESTRICTIONS: The Government of the United States, at the discretion of the Secretary of State, will act on behalf of U.S. nationals in attempting to settle claims against foreign governments. Assistance is not available: (1) to non-nationals, (2) in cases where there has not been an exhaustion of all local administrative or judicial remedies with a resulting denial of justice, or (3) where the respondent government is not responsible under international law. If the claim is found to be valid by the State Department and the Secretary of State chooses to back the claim, the claimant will be informed as to how the claim should be prepared and documented. The State Department, using the documentation prepared by the claimant, would then act on behalf of the claimant in pressing for settlement. Settlements (compensation or restitution) result either from direct negotiation through diplomatic channels or from arbitration, which lead to payment by the foreign government.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: An applicant must have been a United States national at the time the claim arose and must show international responsibility of the respondent government.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: The claimant must furnish evidence establishing his United States nationality, the principle(s) of international law giving rise to an obligation on the part of the foreign government, and the facts and circumstances of the case.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: Potential applicants are invited to discuss possible claims prior to submitting documentation.

Application Procedure: Initial inquiries relating to claims based upon loss of or damage to property should include the following information: (1) date and manner in which claimant became a national of the United States; (2) full description of the property in question and its exact location when loss occurred; (3) date and manner of acquisition of claimant's ownership of the property or other interest therein; (4) the action taken against the property which is considered as giving rise to a claim against a foreign government; (5) identification of laws, decrees, governmental agencies and officials taking the property, and the date the action was taken; (6) the nature and amount of damage. Initial inquiries relating to claims based upon personal injury or loss of life should include a statement of facts relating to: (1) American nationality of the claimant, unless claim is based upon loss of life in which case the American nationality of both the claimant and the deceased must be established; (2) the relationship of the claimant to the deceased in death cases; (3) time, place, and circumstances under which the injury or death occurred, including the identity of persons, officials, or agencies causing the injury or death; and (4) nature and extent of damages sustained.

Award Procedure: The Secretary of State, acting in behalf of the claimant, will make the final determination. If the Secretary of State chooses to represent the claimant, the claimant will be informed of how to prepare the case. Actual payments of claims are the responsibility of the respondent government, not the State Department.

Deadlines: Unlimited, unless provisions of international law establish limits on the time allowed for filing a particular claim (laches).

Range of Approval/Disapproval Time: Requests for assistance are acknowledged immediately.

Appeals: Not applicable.

Upon certification, amount of reimbursement is paid by Treasury Department. 19.202 SPECIAL DOMESTIC ASSIGNMENTS (Pearson Program)

FEDERAL AGENCY: OFFICE FOR LIAISON WITH STATE AND LOCAL GOVERNMENTS, DEPARTMENT OF STATE

AUTHORIZATION: Foreign Service Act of 1980, Section 503, Public Law 96-465, Chapter 5.

OBJECTIVES: The program has two primary objectives: (a) to allow State and local governments and related organizations to utilize the experience and expertise of Foreign Service Officers, and (b) to permit Foreign Service Officers at approximately mid-career to be assigned to positions with substantial program management responsibility and to become reacquainted with important domestic issues following long periods overseas and/or in Washington.

TYPES OF ASSISTANCE: Provision of Specialized Services.

USES AND USE RESTRICTIONS: A Foreign Service Officer may be utilized for any purpose mutually agreed upon by the Department of State and the host organization. Frequently, officers assigned under this program serve as special assistants to governors, mayors, city managers and county commissioners. They often serve in the international divisions of state departments of commerce. They have also been assigned to a state department of social services, a regional local government innovation group, a state league of towns and cities, an international trade mart and a university.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: A member of the Foreign Service may be assigned for duty in the United States (or in any territory or possession of the United States including the Commonwealth of Puerto Rico) with a State or local government, a public or private nonprofit organization (including an educational institution), or a Member or office of the Congress.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: None.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: Potential applicants are invited to discuss possible requests with the Office of Training and Liaison in the Bureau of Personnel prior to submitting a written proposal.

Application Procedure: There is no application form; an information sheet on the program is available from the Office of Training and Liaison in the Bureau of Personnel. Eligible organizations should submit their proposals in writing; two to three pages are usually adequate.

Award Procedure: Once the proposal is approved, the Department of State will endeavor to identify an interested and qualified officer for the position.

Deadlines: There is no deadline. Although assignments may be made throughout the year, most assignments will be arranged to begin in the summer months when foreign service officers normally rotate to new positions. A lead time of 8 to 12 months is normally required in order to identify and assign an appropriate officer.

Range of Approval/Disapproval Time: Proposals are approved or disapproved immediately. In the case of approved proposals, however, there may be a lengthy delay in identifying an appropriate officer.

Appeals: Not applicable.

Renewals: Assignments are made initially for one year. Subject to concurrence by the host organization, the Foreign Service Officer and the needs of the Department of State, the assignment may be extended for up to an additional year.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: For assignments begun in calendar year 1982, the host organization must reimburse the State Department $8,000 annually. (This sum may be increased slightly for assignments begun in calendar year 1983.) There are no other costs to the host organization except that it must pay for the job-related expenses of the Foreign Service Officer.

Length and Time Phasing of Assistance: The reimbursement to the State Department is usually paid as a lump sum, although there can be flexibility in the payment arrangement.

POST ASSISTANCE REQUIREMENTS:

Reports: The supervisory officer in the host organization must prepare an annual performance evaluation on the Foreign Service Officer.

Audits: None.

Records: None.

FINANCIAL INFORMATION:

Account Identification: 19-0113-1-1-153.

Obligations: Not separately identifiable.

Range and Average of Financial Assistance: At any one time, approximately 22 Foreign Service Officers are assigned to State and local governments and related organizations.

PROGRAM ACCOMPLISHMENTS: The Department of State receives more requests for the assignment of officers than it is able to fill. Eventually, however, it has been able to assign officers to more than half of the organizations which have submitted written proposals. To date, about 85 mid-career officers have been assigned to positions with State and local governments and other qualifying organizations. Job assignments have varied, but have typically involved substantial program management responsibilities, including coordination with city, county and state authorities and federal agencies.

REGULATIONS, GUIDELINES, AND LITERATURE: Additional information on the program is available from the State Department's Office of Training and Liaison in the Bureau of Personnel.

New legislation will be required to continue the program beyond fiscal year 1981.

OBJECTIVES: To assist public agencies in the development of a nationwide system of public airports adequate to meet the needs of civil aeronautics.

TYPES OF ASSISTANCE: Project Grants; Advisory Services and Counseling.

USES AND USE RESTRICTIONS: Grants can be made for constructing, improving, or repairing a public airport or portion thereof consisting of: (1) land acquisition, (2) site preparation, (3) construction, alteration, and repair of runways, taxiways, aprons, and roads within airport boundaries, (4) construction and installation of lighting utilities, navigational aids, and certain offsite work, (5) safety equipment required for certification of airport facility, (6) security equipment required of the sponsor by the Secretary of Transportation by rule or regulation for the safety and security of persons and property on the airport, (7) snow removal equipment, (8) noise supressing equipment, construction of physical barriers, landscaping and land acquisition for carrying out noise compatibility program, and (9) terminal development. Grants may not be made for the construction of hangars, parking areas for automobiles, or for buildings not related to the safety of persons on the airport. Technical advisory services are also provided.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: State, county, municipal, and other public agencies including an Indian tribe or Pueblo are eligible for airport development grants if the airport on which the development is required is listed in the National Airport System Plan. Certain units of local governments surrounding airports may be eligible for grants associated with achieving noise compatibility with airports.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: Sponsors must submit information establishing financial capability and legal authority to accomplish the project and to operate the airport. Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: Preapplication conference recommended but not required. Consultation and assistance available at FAA District and Regional Offices. Applications should be reviewed under the provisions of National Environmental Policy Act of 1969, 83 Stat. 852; Sec. 4(f) of the Department of Transportation Act 49 U.S.C. 1653; and Federal Aviation Regulations, 14 CFR, Part 152, environmental impact assessment report needed for some projects. The standard application forms as furnished by the Federal agency and required by OMB Circular No. A-102 must be used for this program. Applications are subject to State and areawide clearinghouses review pursuant to procedures in Part I, Attachment A of OMB Circular No. A-95 (revised).

Application Procedure: Preapplication for Federal Assistance, SF 424, Part I (facesheet) and remaining parts of FAA Form 5100-30 is filed with District Office, reviewed by Regional Office and/or Washington Office for program approval, as appropriate. Level of approval is dependent on the type of airport and amount of FAA monies requested. No State plan is required.

Award Procedure: Upon program approval, applicant submits project application, SF 424, Part I (facesheet) and remaining parts of FAA Form 5100-100 to District Office. Reviewed and forwarded to region. Either the District or Regional Office prepares Grant Offer, FAA Form 5100-13 for execution by FAA and applicant. Notification of award must be made to the designated State Central Information Reception Agency, and the State Clearinghouse in accordance with Treasury Circular 1082.

Deadlines: Published annually in the Federal Register. Normally applicants must file prior to June 30 or any fiscal year to be considered for assistance in that year. Contact Headquarters Office for further details.

Range of Approval/Disapproval Time:

Appeals: Not applicable.

Renewals: None.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: For fiscal year 1981, the Federal Government share of allowable costs of airport development projects could not exceed: 75 percent for an air carrier airport (other than a commuter service airport) which enplaned one-quarter of one percent or more of all passengers enplaned at all such airports, and 90 percent for all other airports, i.e., general aviation airports, reliever airports, and commuter service airports, and air carrier airports which enplaned less than one-quarter of one percent of such passengers. The federal share of development grant to achieve noise capability was 80 percent. The Federal share for terminal development projects at air carrier airports was funded only from the airport's enplanement apportionment and no more than 60 percent of such apportionment for any fiscal year could be obligated for such projects. The Federal share of terminal development projects was be 50 percent. Rates were slightly higher in a few states containing large amounts of public lands. The program operate under a statutory formula. The statistical factors for allocation under the Air Carrier Program were derived from the number of passengers enplaned by airports during 1979, as determined by data obtained from the following sources: FAA: Commercial Operations Survey, the Immigration and Naturalization Service, and the Civil Aeronautics Board. For the General Aviation Program, the factors for allocation were 1) land area by State and 2) population by State; the source for statistical data was the 1976 Statistical Abstracts used in conjunction with the 1970 Decennial Census. There were no statistical factors used for eligibility.

Length and Time Phasing of Assistance: No set period of time. Assistance is released upon application for progress payments as needed.

POST ASSISTANCE REQUIREMENTS:

Reports: During the project, the sponsor monitors performance to assure that time schedules are being met. A quarterly report, in this regard, is forwarded to FAA.

Audits: Present procedures provide that an audit be made upon project completion to determine allowable project costs. Under the total audit concept, audits will be made on an organization-wide basis (rather than (grant-by-grant) under GAO guidelines, Standards for Audit of Governmental Organizations, Programs, Activities and Functions, ad for programs covered by A-102, Attachment P.

Records: Sponsors' records are required to be made available for inspection by FAA and General Accounting Office. Layout plan of the airport must be kept up to date and available as long as this agreement lasts, ordinarily a period of 20 years. Accounting records reflecting all project costs, books, documents, and records pertinent to grants received under ADAP retained for three years after date of submission of final expenditure report.

20.205 HIGHWAY PLANNING AND CONSTRUCTION

(Federal-Aid Highway Program)

FEDERAL AGENCY: FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

AUTHORIZATION: Title 23 U.S.C., "Highways"; revised and codified in 1958 by Public Law 85-767; Federal-Aid Highway Act of 1970, Public Law 91-605; Federal-Aid Highway Act of 1973, Public Law 93-87; Federal-Aid Highway Amendments of 1974, Public Law 93-643; Federal-Aid Highway Act of 1976, Public Law 94-280; Surface Transportation Assistance Act of 1978, Public Law 95-599 as amended by Public Law 96-106, Federal-Aid Highway Act of 1981, Public Law 97-134.

OBJECTIVES: To assist State highway agencies (SHA) in the development of an integrated, interconnected network of highways by constructing and rehabilitating the Interstate highway system and building or improving primary, secondary, and urban systems roads and streets; to provide aid for their repair following disasters; to foster safe highway design; to replace or rehabilitate deficient or obsolete bridges; and to provide for other special purposes. Also provides for the improvement of some highways in Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands.

TYPES OF ASSISTANCE: Formula Grants; Project Grants.

USES AND USE RESTRICTIONS: Depending on which aspect of the program funds are applied to, they may be used for planning, research, surveying, engineering, right-of-way acquisition, new construction, reconstruction, repair, improvement, restoration, rehabilitation, resurfacing, roadside beautification, relocation assistance and recreation. Funds may be applied to highways, bridges, bicycle transportation, pedestrian walkways, fringe and corridor parking facilities, and rest areas. These funds cannot participate in any maintenance activities, such as pothole patching or snowplowing. All capital projects in urban areas of more than 50,000 population must be based on a continuing comprehensive planning process. Some county and local roads and streets may be part of a Federal-aid system and are eligible for improvement, but only through State highway agency coordination and action. Federal-aid urban system authorizations may be used for mass transit capital improvements at the request of State and local governments. Certain Interstate segments in urbanized areas may be withdrawn from the System upon the joint request of the Governor and local governments concerned, with substitution funding made available as a result from the General Treasury by congressional appropriations for highway and mass transit projects or any combination of the two as selected by responsible local officials and submitted by the Governor. Special programs for highway safety, bridge replacement and rehabilitation, and railroad grade crossing protection are available for roads on Federal-aid systems; the latter two programs are available for off-system roads as well. This program is eligible for joint funding but the initiative lies with the State Highway Agency. The State Highway Agency is responsible for reviewing and rejecting or approving on a final basis specific State projects. JOINT FUNDING: This program is considered suitable for joint funding with closely related Federal financial assistance programs in accordance with the provisions of OMB Circular No. A-111. For programs that are not identified as suitable for joint funding, the applicant may consult the headquarters or field office of the appropriate funding agency for further information on statutory or other restrictions involved.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: State highway agencies. Projects related to bicycle transportation and forest and public lands highway, certain projects in urban areas, or projects off the State highways systems may be proposed by counties and other political subdivisions or agencies through the State highway agencies. Territorial highway projects are funded in the same manner as other Federal-aid highway projects, with the territorial highway agency functioning as the State highway agency.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: Federal-aid secondary projects must be selected in cooperation with local officials. Urban System projects must be selected by local officials with concurrence of the State. Most other types of projects are selected by the SHAs in cooperation with local officials. Applications are subject to State and areawide clearinghouse reviews pursuant to procedures in Part I, Attachment A of OMB Circular No. A-95 (revised). An environmental impact assessment is required for this program.

Application Procedure: State highway agencies submit a program of desired projects to the State-level office of the Federal Highway Administration; for projects related to forest highways submissions are made to the Direct Federal Division Engineers.

Award Procedure: In general, the State level office of FHWA makes final decision on the eligibility of specific projects for funding but the state highway agencies generally dcecide which projects will be develop within apportioned funding levels; however, some project eligibility decisions are made at the FHWA Headquarters or Region level Offices. Notification of awards occurs at time of apportionment or allocation of funds rather than at time of project approval and must be made to the designated State Central Information Reception Agency in accordance with Treasury Circular 1082. There are several categories where limited assistance is allocated at the discretion of the Secretary of Transportation. Candidate projects are usually solicited around the start of the fiscal year and must be submitted by the State highway agencies.

Deadlines: With regular formula programs, there are no deadlines for funding requests. For the limited number of discretionary project grants, applications are usually considered late in the fiscal year before the year for which the funds are available. Grants are generally made early in the fiscal year. All grants are made through the SHAs, which are advised of schedules for submission of candidates.

Range of Approval/Disapproval Time: Five days to five months.

Appeals: None.

Renewals: None.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: Formulas where applicable are based on independently derived factors such as ratio of population, area and road mileage that generally reflect needs in a single State relative to the totals for all States. Both statutory and administrative formulas are used. Some categories, plus part of the Interstate, primary, and bridge funds, are distributed on an as-needed basis. The normal Federal share is 90 percent for Interstate and safety projects, 80 percent for bridge replacement and rehabilitation, and 75 percent for most other projects. The Federal share may be increased in the case of States with large areas of public lands. Some projects, including territorial highway projects, require no State matching of Federal funds. This program has maintenance of effort (MOE) requirements; see funding agency for further details. The broad concept of the Highway Planning and Construction Program includes over 30 sub-program areas. The following list includes a sample of these areas with their respective statistical factors, sources used for allocation, and the types of formulas used to determine the means of allocation and eligibility requirements. 20.507 URBAN MASS TRANSPORTATION CAPITAL AND OPERATING ASSISTANCE FORMULA GRANTS

(Formula Grant Program)

FEDERAL AGENCY: URBAN MASS TRANSPORTATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

AUTHORIZATION: Urban Mass Transportation Act of 1964; Public Law 88-365, as amended; 49 U.S.C. 1601 et seq.

OBJECTIVES: To assist in financing the acquisition, construction, and improvement of facilities and equipment for use by operation or lease or otherwise in mass transportation service, and the payment of operating expenses to improve or to continue such service by operation, lease, contract or otherwise.

TYPES OF ASSISTANCE: Formula Grants.

USES AND USE RESTRICTIONS: Eligible capital assistance projects may include the acquisition, construction or reconstruction of facilities and equipment for use in mass transportation, including designing, engineering, locating, surveying, mapping, acquisition of rights-of-way, relocation assistance, and acquisition and replacement of housing sites. An operating assistance project represents the eligible operating expenses incurred or projected during a local fiscal year by a mass transportation operator or system serving an urbanized area. Projects must be developed through a continuing cooperative and comprehensive urban transportation planning process, resulting in plans and programs for a unified or officially coordinated urban transportation system consistent with the planned development of the urban area. Under the Surface Transportation Assistance Act of 1978 (STAA), signed into law on November 6, 1978, the formula grant program is continued, expanded and revised. For the first time, Title III of the STAA identified four distinct elements of the formula grant program, establishing separate budgetary accounts per element. The four distinct elements of the program are: (1) Base Capital and Operating Assistance - This element comprises the bulk of federal assistance under the formula grant program for capital projects and operating cost assistance. (2) Supplemental Capital and Operating Assistance - This element is an extension of element(1) above, though giving greater weight to urbanized areas greater than 750,000 in population. (3) Commuter Rail/Fixed Guideway Capital and Operating Assistance - This element specifically authorizes the apportionment of funds for capital or operating assistance projects involving commuter rail or other fixed guideway systems. (4) Bus and Bus Related Capital Assistance - This element supports the purchase of buses and related equipment as well as the construction of bus related facilities. There was a maintenance of effort requirement that the operating subsidy from state and local non-farebox sources during the current project year had to be at least equal to the average of the subsidies for the two previous project years. This requirement only applied to money apportioned prior to September 30, 1981.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Funds will be made available to urbanized areas (as defined by the Bureau of the Census) through designated recipients which must be public entities and legally capable of receiving and dispensing Federal funds. The Governor, responsible local officials, and publicly-owned operators of mass transportation services must jointly designate the recipient(s) for urbanized areas of 200,000 or more population. The Governor or his designee is the recipient for urbanized areas of 50,000 to 200,000 population. Recipients must submit a program of projects to UMTA and the Governor through the Metropolitan Planning Organization as part of the annual elements of the areawide Transportation Improvement Plan; submit project applications to UMTA; enter into formal project agreements with UMTA; and certify that a public hearing has been conducted.

Beneficiary Eligibility: Publicly and privately owned operators of mass transportation services.

Credentials/Documentation: Requested documentation; annual programming of projects, coordinated regional planning documentation, legal, technical, and maintenance of effort, (improved or continued service), labor, public hearing. Costs will be determined in accordance with OMB Circular No. A-87 except as notified by UMTA pursuant to Section 5(d) (2) of the Act.

APPLICATION AND AWARD PROCESS:

21.300 STATE AND LOCAL GOVERNMENT FISCAL ASSISTANCE—GENERAL REVENUE SHARING

(Revenue Sharing)

FEDERAL AGENCY: OFFICE OF REVENUE SHARING, DEPARTMENT OF THE TREASURY

AUTHORIZATION: The State and Local Fiscal Assistance Act of 1972, Title I, Public Law 92-512, 86 Stat. 919, 31 U.S.C. 1221, et seq.; Amendments: State and Local Fiscal Assistance Amendments of 1976, Public Law 94-488, 90 Stat. 2341, et seq.; State and Local Fiscal Assistance Act Amendments of 1980, Public Law 96-604, 94 Stat. 3516.

OBJECTIVES: To provide financial assistance to State governments and general purpose local governments.

TYPES OF ASSISTANCE: Formula Grants.

USES AND USE RESTRICTIONS: Revenue sharing funds (obligated or appropriated) should be used by a recipient government within 24 months of the end of an entitlement period for any purpose which is a legal use of its own source revenues authorized by its governing body following two public hearings held specifically to permit the public to: (1) suggest proposed use of funds, and (2) discuss the recipient government's proposed use of revenue sharing funds relative to the government's entire budget. Notices of hearings are to be published in local newspapers at least 10 days in advance of each hearing. Adherence to nondiscrimination provisions in any program or activity using revenue sharing funds is required. Adherence to the Davis Bacon Wage Provisions is required in construction projects costing two thousand dollars or more when 25 percent of total costs is paid with Revenue Sharing Funds. Recipient governments may spend revenue sharing funds for the State or local contribution to a Federal matching grant program, provided that this is acceptable to the Federal agency administering the matching grant and does not violate any State or local law. Recipients may transfer shared revenues to secondary recipients. Nondiscrimination requirements continue to be applicable. Funds may not be used for lobbying purposes with respect to the Revenue Sharing Act, as amended.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: General purpose local governments, including the District of Columbia, the governing bodies of Indian tribes or Alaskan native villages performing substantial governmental functions, and the offices of the separate law enforcement officers for county areas (Parishes) in the State of Louisiana. In fiscal years 1982 and 1983, there is an authorization of appropriations for State governments subject to an appropriation by Congress and a requirement for States to refuse or refund an amount of categorical aid equal to their revenue sharing allocations. General purpose local governments are determined by the Census Bureau on the basis of the same principles used for general statistical purposes. Indian tribes and Alaskan native villages performing substantial governmental functions are determined either by the Bureau of Indian Affairs or by a State Governor.

Beneficiary Eligibility: Any person, group, or agency may seek revenue sharing funds from a recipient State or local government and must be allowed to participate in two required public hearings on the use of these funds. The final decision about how the recipient government is to use its revenue sharing funds is made by its governing body.

Credentials/Documentation: Governments must submit a Statement of Assurances (SOA) as provided by the Office of Revenue Sharing (ORS) signed by the chief executive of each recipient government certifying that funds to which it is entitled for a specific entitlement period will be expended in accordance with the Revenue Sharing Act and regulations.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: None.

Application Procedure: An application is not necessary to receive funds. Based upon data furnished by the Census Bureau, funds are automatically allocated to eligible governments.

Award Procedure: Eligible recipient governments are notified directly by ORS of their entitlement amounts at the time they are sent Statement of Assurance (SOA) forms.

Deadlines: To receive the first scheduled payment of revenue sharing funds for Entitlement Period 14 (federal fiscal year 1983), a recipient government must file a signed SOA not later than December 15, 1982. Assurance forms for Period 14 will be mailed to recipient governments in August 1982.

Range of Approval/Disapproval Time: Normally, cards acknowledging receipt of assurance forms are mailed within one month after they are received.

Appeals: Recipient governments may challenge the validity of the data of record for their government used in the formula (See Formula and Matching Requirements below) for Entitlement Period 14 until September 30, 1984.

Renewals: Not applicable.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: The statistical factors for fund allocation are: 1. the total population of States and localities and the source is the Bureau of Census population data; 2. the State and national aggregate personal income and the source is the "Personal Income Series", Bureau of Economic Analysis; 3. the per capita State and local income and the source is the Bureau of the Census estimates; 4. the Federal individual income tax liability and the source is the administrative records of the Internal Revenue Service; 5. the State and local tax and the source is the Census Bureau's "Governmental Finances"; 6. the local government adjusted taxes and intergovernmental transfers and the source is the Census Bureau's financial surveys; 7. the urban population from the "1980 Decennial Census"; and 8. the resident Indian population from the Bureau of the Census estimates. Statistical factors used for eligibility do not apply to this program. As required by statute, allocations to the 50 State areas are determined by either a five factor formula (population, urbanized population, per capita income, State income tax collections and tax effort) or a three factor formula (population, tax effort and relative income), whichever produces the higher amount. The State area amount is allocated among local governments based on the formulas specified in the Act. This program has maintenance of effort (MOE) requirements; see funding agency for further details.

Length and Time Phasing of Assistance: Entitlement amounts are for a specific entitlement period. Entitlement Period 14 is federal fiscal year 1983. Funds are paid in quarterly installments. Recipient governments have 24 months from the end of an entitlement period to use funds received for that period.

POST ASSISTANCE REQUIREMENTS:

Reports: Recipient governments are required to respond to the annual Census Bureau General Revenue Sharing Survey, Survey of Local Government Finances and/or similar surveys conducted by a State or county agency in cooperation with the Census Bureau to collect data required for the formula and to report how revenue sharing funds were spent during the fiscal year. Recipient governments are given the opportunity to review and challenge data elements used to compute their allocations.

Audits: Recipient governments, which expect to receive $25,000 or more of revenue sharing funds for three consecutive entitlement periods must have an independent financial audit of all their funds and a compliance audit of revenue sharing funds performed in accordance with generally accepted auditing standards, not less often than once every three fiscal years.

Records: Recipient governments must establish a local trust fund and deposit all revenue sharing funds and interest earned in it; maintain records sufficient to: document required reports and permit the tracing of revenue sharing funds to establish compliance with requirements; and at a minimum, maintain the same records as required for its own funds. Records are required to be maintained in accordance with the Uniform Guidelines on Employee Selection to document conformance with the nondiscrimination provisions of the Act.

FINANCIAL INFORMATION:

Account Identification: 20-8111-0-7-851.

Range and Average of Financial Assistance: Smallest allocation amount: $200 (minimum by law); largest allocation amount: $281,431,998 (New York City for FY 83); average allocation amount is $114,422. Indian governments and Alaskan Native villages may receive less than the $200 minimum.

PROGRAM ACCOMPLISHMENTS: Approximately 39,909 local governments were eligible to receive $4.6 billion of revenue sharing funds in Entitlement Period 13 (federal fiscal year 1982). Approximately the same number of local governments are eligible to share the same amount in Entitlement Period 14 (federal fiscal year 1983) as was received by local governments in Entitlement Period 13.

23.001 APPALACHIAN REGIONAL DEVELOPMENT (SEE INDIVIDUAL APPALACHIAN PROGRAMS)

(Appalachian Program)

FEDERAL AGENCY: APPALACHIAN REGIONAL COMMISSION

AUTHORIZATION: Appalachian Regional Development Act of 1965, Public Law 89-4; as amended by Public Law 90-103; Public Law 91-123; Public Law 92-65; and Public Law 94-188; Public Law 91-193; Public law 96-506, Public Law 97-35; 40 App. U.S.C. 1-405.

OBJECTIVES: To stimulate substantial public investments in public facilities that will start the region on its way toward accelerated social and economic development; to help establish a set of institutions in Appalachia capable of permanently directing the long-term development of the region; and on a joint Federal-State-local basis, to develop comprehensive plans and programs to help accomplish the overall objectives of Appalachian development, including meeting the special demands created by the nation's energy needs and policies.

TYPES OF ASSISTANCE: Project Grants.

USES AND USE RESTRICTIONS: Appalachian funds enable the States and local areas to develop networks of facilities and services. The individual programs following this description illustrate the types of investments that can be made. In considering programs and projects to be given assistance under this Act, and in establishing a priority ranking of the requests for assistance presented to the Commission, the Commission follows procedures insuring consideration of the following factors: (1) the relationship of the project or class of projects to overall regional development, including its location in an area determined by the State as having a significant potential for growth; (2) the population and area to be served by the project or class of projects including the relative per capita income and the unemployment rates in the area; (3) the relative financial resources available to the State or political subdivision or instrumentalities thereof which seek to undertake the project; (4) the importance of the project or class of projects in relation to other projects or classes of projects which may be in competition for the same funds; (5) the prospects that the project for which assistance is sought will improve, on a continuing rather than a temporary basis, the opportunities for employment, the average level of income, or the economic and social development of the area served by the project; and (6) no financial assistance can be used (a) to assist establishments relocating from one area to another; (b) to finance the cost of industrial plants, commercial facilities, machinery, working capital, or other industrial facilities or to enable plant subcontractors to undertake work theretofore performed in another area by other subcontractors or contractors; (c) to finance the cost of facilities for the generation, transmission, or distribution of electric energy; (d) to finance the cost of facilities for the production, transmission, distribution of gas (natural, manufactured, or mixed); (e) to finance projects not already approved in the 1981 Investment Program; or (f) to finance non-capital projects with no prior year obligations. (Note: restriction (b), (c), and (d) on financial assistance may be waived for energy enterprise development and indigenous arts and crafts projects). ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: (a) States, and through the States, public bodies and private nonprofit organizations; and (b) limited dividend organizations are eligible for the Appalachian housing fund. All proposed projects must meet the requirements of the State Appalachian plan and the annual State investment program, both of which must be approved annually by the Commission. (See individual Appalachian program descriptions).

Beneficiary Eligibility: General public.

Credentials/Documentation: (See individual Appalachian program descriptions).

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: General Nature and Administration of Appalachian Regional Development Program. The Appalachian Regional Development program is a joint Federal-State partnership for the development of the Appalachian region. Responsibility for the development of plans and programs authorized under the Act is vested in the Appalachian Regional Commission, composed of members who are the 13 State Governors (who may appoint alternates) and a Federal Cochairman. General policies and procedures, and the allocation of Appalachian funds among the various programs and states are established by the Commission itself. Application for assistance may only be made through a State member of the Commission. The Appalachian State Alternate's Offices are the coordinators for the Governors for Appalachian investments. Preapplication conferences can determine within a few weeks if the project conforms to the State Appalachian Development Plan. The appropriate local development district director should be the first contact. The District Director or State Alternate's Offices will provide guidance on specific problems and technical assistance in the preparation of applications. (See individual Appalachian program descriptions).

Application Procedure: Applications for individual projects must be submitted through and with the approval of the State Alternate to the Appalachian Regional Commission (listed in the Catalog appendix). (See individual Appalachian program description).

Award Procedure: Upon receipt of project applications approved by the State, the Federal Cochairman determines that the project satisfies all requirements for assistance under the Act and approves the application. The basic Federal agency is then notified and in most cases administers the grants, and disburses funds. The Appalachian Regional Commission makes notification of grant award to Congressional offices, and the office of the governor of grant approval. (See individual Appalachian program descriptions).

Deadlines: (See individual Appalachian Program descriptions).

Range of Approval/Disapproval Time: (See individual Appalachian program descriptions).

Appeals: There are no formal appeal procedures as such, project review allows for full and free interchange with applicants.

Renewals: Generally renewals are not applicable except for the planning and operating grants of demonstration health projects (23.004) for vocational education demonstration grants (23.016), child development grants (23.013), and for the administrative expenses, including technical services, of local development districts (23.009).

Length and Time Phasing of Assistance: Not applicable except for five years operating assistance to demonstration health projects (23.004) and child development projects (23.013). Assistance is generally provided as required.

POST ASSISTANCE REQUIREMENTS:

Reports: Reporting and performance monitoring as required by the basic Federal agency and the Commission for those programs directly administered by the Commission. The Commission requires quarterly reports of local development districts and housing technical assistance grants. (See individual Appalachian program descriptions).

Audits: Audits as required by the basic Federal agency and the Commission. In accordance with the provisions of Attachment P to Circular A-102, "Uniform Requirements for Grants to State and Local Governments," audits shall be made of organizations carrying out this program at least once every two years. These audits will be made in accordance with the General Accounting Office guidelines, "Standards for Audit of Government Organizations, Programs, Activities and Functions," and additional OMB guidance.

AUTHORIZATION: Civil Rights Act of 1964, Title VII, as amended by Public Laws 88-352 and 92-261, 42 U.S.C. 2000e-5.

OBJECTIVES: To provide for enforcement of the Federal prohibition against employment discrimination in the private and public sector based on race, color, religion, sex or national origin.

TYPES OF ASSISTANCE: Investigation of Complaints.

USES AND USE RESTRICTIONS: Complaints of discriminatory employment practices by or on behalf of an individual claiming to be aggrieved are received. Settlement attempts and investigations ensue; and if "reasonable cause" is found, conciliated. If conciliation proves to be unsuccessful, the Commission may bring civil action against respondents named in the charge. Special program developed for alleged systemic practices.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Any aggrieved individual or individuals, labor union, association, legal representative, or unincorporated organization, filing on behalf of an aggrieved individual, who have reason to believe that an unlawful employment practice within the meaning of Title VII, as amended, has been committed by an employer, employment agency, labor organization or joint labor-management committee with more than 15 employees.

Beneficiary Eligibility: Potential employees, employees and former employees of the named respondents in a charge who have been subject to unlawful employment practices.

Credentials/Documentation: An allegation of unlawful employment practice(s) must be in writing, signed, and notarized or supported by an unsworn declaration in writing under penalty of perjury. Charge forms (EEOC Forms 5A and 5B Charge of Discrimination) are available to all persons from all offices of the Commission.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: None.

Application Procedure: A charge may be filed by any aggrieved individual or by any organization, i.e., labor union, association, legal representative, unincorporated organization, etc., either as an aggrieved entity or on behalf of an aggrieved individual.

Award Procedure: A charge is deemed filed when the Commission receives from the person making the charge a written statement sufficiently precise to identify the parties and to describe specifically the action or practices complained of.

Deadlines: A charge of unlawful employment practices must be filed within 180 days after the alleged unlawful employment practice has occurred. In cases where the practice is of a continuing nature, the last day of the violation and not its inception determines the running of the 180 days. In certain circumstances where proceedings have been instituted with a State or local Fair Employment Practices Commission (FEPC) with authority to grant or seek relief from an alleged unlawful employment practice, this time limit is changed to 300 days or within 30 days after the charging party received notice that the State or local FEPC has terminated its proceeding, whichever is earlier.

40.002 GOVERNMENT PUBLICATIONS—SALES AND DISTRIBUTION

(The Government Bookstore)

FEDERAL AGENCY: GOVERNMENT PRINTING OFFICE

AUTHORIZATION: 44 U.S.C. Chapter 17.

OBJECTIVES: To make U.S. Government publications available for purchase.

TYPES OF ASSISTANCE: Sale, Exchange, or Donation of Property and Goods; Dissemination of Technical Information.

USES AND USE RESTRICTIONS: The Superintendent of Documents, Government Printing Office, is an authorized sales agent for publications resulting from study and research conducted by the various departments and agencies of the Federal Government. More than 21,000 titles covering nearly every field of interest are available for purchase at nominal prices. If purchasers order 100 copies or more of one publication to be mailed to a single address, they will receive a 25 percent discount. Bookdealers, regardless of the quantity purchased, will be allowed a 25 percent discount when the publications, pamphlets, periodicals or subscription services are mailed, delivered, or forwarded to the dealer's normal place of business. No discounts are allowed when the publication, pamphlet, periodical, or subscription service is mailed to a third party (unless in quantities of 100 or more), or on those periodicals and subscription services which fall into a special pricing category as noted in price list No. 36, "Government Periodicals and Subscription Services" which is described below. Generally speaking, there are no restrictions on reprinting or quoting from U.S. Government Publications, as the code of laws of the United States provides that they cannot be copyrighted. However, Government publications occasionally contain copyrighted material which was used with permission of the copyright owner, and publication in a Government document does not authorize any use or appropriation of such copyright material without the consent of the owner. Since the Government Printing Office serves merely as a printing and distribution agency for Government publications and has no jurisdiction over their content or subject matter, it is suggested that the originating department or agency or its successor be consulted prior to reprinting or quoting from any given publication. In those instances in which permission to reprint material from Government publications is granted, customary credit should be given to the Government Department which prepared the material. By law, every publication printed through the GPO, whether it is designated for sale or not, must be cataloged and indexed. The "Monthly Catalog," which is produced to fulfill this obligation, lists all publications printed and is available to the public on a subscription basis. The Superintendent of Documents distributes over 500 Federal publications, which are of a nature to be supplemented or revised regularly, and periodicals. These subscription items are listed in the Superintendent of Documents price list no. 36, "Government Periodicals and Subscription Services," which is revised quarterly and includes order blanks for obtaining these items.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: The services of the Superintendent of Documents are available to all interested parties and there are no eligibility requirements.

Funds may not be used to support non-humanities institutions or activities; nor can they support humanities "projects" which may be funded under the other regular and competitive NEH programs.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Any nonprofit humanities institution, association or organization is eligible to apply; institutions whose scope encompasses activities outside the humanities (e.g., arts, science, medicine) may apply for a challenge grant to cover the costs of only the humanities component, or that percentage of total institutional cost which can be directly identified with these. Local, county and state governments are eligible to apply on their own behalf or on behalf of nonprofit institutions, associations or organizations within their jurisdictions; individuals and public and private elementary and secondary schools are not eligible to apply.

POST ASSISTANCE REQUIREMENTS:

Reports: Narrative progress reports are required annually; reports on non-Federal contributions, matching funds raised and sources of giving are required annually. Final progress and contributions reports are due within 90 days after completion or termination of grant support by NEH.

REGULATIONS, GUIDELINES, AND LITERATURE: 45. CFR 1100 and 1105. National Endowment for the Humanities, Sixteenth Annual Report (FY 1981.) Available from Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. National Endowment for the Humanities Program Announcement, Program Information for Applicants, and Challenge Grant Guidelines, available on request from National Endowment for the Humanities, MS 351, Washington, DC 20506.

INFORMATION CONTACTS:

Regional or Local Office: Not applicable.

Headquarters Office: Tom Kingston, Challenge Grant Program, MS 800, National Endowment for the Humanities, Washington, DC 20506. Telephone: (202) 724-0267.

RELATED PROGRAMS: None.

EXAMPLES OF FUNDED PROJECTS: (1) An historical society in Illinois is using its Challenge Grant to establish a development office to broaden its membership base in community support as well as business, corporate and foundation support. The society is also utilizing the grant to partially amortize the accumulated liabilities in its pension and endowment funds. (2) A college in Vermont is using its grant support to provide new strengths in the college's humanities disciplines, particularly in the expansion of Language, English Literature, and History programs and the creation of new endowments. New sources of giving from alumni, friends, foundations and corporations have added to the college's traditional pool of supporters to provide continuing support. (3) A state museum was awarded a grant to raise monies for the development of a museum association. The recently established museum on Tennessee history and culture will now be able to hire a public relations director and provide for needed equipment and storage facilities. (4) An historical library and museum in Delaware received a grant for capital improvements, including new storage facilities for archival research collections and energy conservation measures. Funds will also be used for special self-help and outreach programs, including the increase and consolidation of new sources of financial support, the completion of an operational efficiency study and the expansion of various humanities programs.

CRITERIA FOR SELECTING PROPOSALS: Besides meeting the eligibility requirements applications are weighed in four basic areas: (1) Need - Financial need demonstrated in the application. The financial profile makes the case for Challenge Grant support. The institution has carefully assessed its needs against the likely impact an award would make. (2) Financial Goals - It appears that the Challenge Grant will help the institution improve its financial situation over the long run, or achieve financial stability. The extent to which a grant will enable the institution to build a better long-term base of support for its programs and services in the humanities. Expenditures bear a reasonable relation to the institution's present and long-term needs in the humanities. There is a clear relationship between expenditures and humanities programs and resources. There is a reasonable relationship between the grant request and the institution's total budget and operating costs. (3) Program Goals - It appears that a Challenge Grant will significantly strengthen or improve the institution's resources and services in the humanities. An award (or absence of one) will make a great difference in the institution's long-term plans. (4) Fundraising Plan - The proposed fundraising plan must be sound. The fundraising goal must be in reasonable proportion to the past fundraising levels and succcesses. The fundraising plan promises to actually broaden and extend sources of support.

OBJECTIVES: To avoid or substantially minimize industrial strife affecting interstate commerce by providing orderly and peaceful procedures to protect the rights of employers, employees, labor organizations, and the general public, and to prevent unlawful interference with these rights.

TYPES OF ASSISTANCE: Provision of Specialized Services; Investigation of Complaints.

USES AND USE RESTRICTIONS: Determines and implements, through secret-ballot elections, the free democratic choice by employees as to whether they wish to be represented by a union in dealing with their employer and, if so, by which union, and (2) prevents and remedies unlawful acts, called unfair labor practices, by either employers or unions or both. NLRB may seek injunctive relief where a labor dispute results in violence, disruption of employment, or disruption of business relations, possibly in violation of the Labor Management Relations Act. The NLRB does not initiate actions or investigations on its own motion. NLRB processes start only when an individual or an organization files an unfair labor practice charge or a petition for an election.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Any employer, employee, labor organization, or other person who believes a violation of the Labor Management Relations Act has occurred, or who desires the Board to determine whether a labor organization is to be the choice of employees for purposes of representation, may receive information or assistance. The Act limits the term "employee" to exclude: agricultural laborers; domestic servants; individuals employed by spouse or parent; independent contractors; supervisors (as defined by Act) and individuals employed by an employer subject to Railway Labor Act or any person who is not an employer as defined by the Act. The United states Government, State governments, political subdivisions of U.S. and State governments, government corporations (except the U.S. Postal Service), Federal Reserve Banks and employers subject to Railway Labor Act are ineligible employers.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: None.

APPLICATION AND AWARD PROCESS:

Application Procedure: Charges of unfair labor practices and petitions for determination of representatives are the two principal forms for the purpose of initiating agency action. Such charges and petitions shall be in writing and signed, and either shall be sworn to and filed with the Regional Director for the region in which the unfair labor practice has occurred or in which the proposed or actual bargaining unit exists.

Award Procedure: Not applicable.

Deadlines: A party alleging a violation of the Labor Management Relations Act must file its charge within six (6) months after incident has occurred. If the filing of a charge was prevented by service with the Armed Forces, the six (6) month limitation is computed from the day of discharge. Deadlines for filing representation petitions vary with the type of petition filed and the representation status of employees sought to be represented. Those wishing to file representation petitions with the Agency should contact the appropriate regional office of the National Labor Relations Board listed in Appendix IV of the Catalog.

Range of Approval/Disapproval Time: Not applicable.

Appeals: Charges: If the regional director refuses to issue an unfair labor practice complaint, an appeal may be filed with the general counsel in Washington, DC, within 10 days. Petitions: If the regional director dismisses the representation petition, an appeal may be filed with the Board in Washington, DC within 10 days.

In fiscal year 1982, 2,903 applications for fellowships were received; approximately 1,390 are expected to be awarded; in fiscal 1983, approximately the same number will be supported.

REGULATIONS, GUIDELINES, AND LITERATURE: 45 CFR Chapter VI; 41 CFR 25. Program announcements (at no charge).

INFORMATION CONTACTS:

Regional or Local Office: Fellowship Office, National Research Council, 2101 Constitution Ave., N.W., Washington, DC 20814.

Headquarters Office: Dr. Douglas Chapin, Staff Associate, Division of Scientific Personnel Improvement, National Science Foundation, 1800 G Street, N.W., Washington, DC 20550. Telephone: (202) 282-7754.

RELATED PROGRAMS: None.

EXAMPLES OF FUNDED PROJECTS: Through one project, 125 minority high school students are engaged in small team projects in mechanical design, solar energy, or electrical engineering. These projects are designed to give them direct experience in applying scientific principles to the solution of engineering problems and first hand information on careers and academic requirements for the study of engineering. In another project, a comprehensive plan to increase the number of Hispanics and Native Americans entering scientific and engineering careers was developed. Based on a state-wide model to be implemented in New Mexico, the plan entails collaborative efforts of the Federal government, the State government (both executive and legislative branches), industries, universities and other educational units, professional societies, and minority organizations. At a particular biology laboratory, faculty and students have participated in research related to the responses of natural ecological systems to perturbations associated with energy development technologies. Such collaborative research experience is intended to enhance undergraduate education and should ultimately improve students' chances of gaining employment with industrial facilities, national laboratories, or other research institutions. In one area, a project has been initiated to educate a group of high school teachers in the chemistry and applications of polymeric materials and to make them aware of the magnitude of the polymer-based industrial activities, so that they may, in turn, stimulate the interest of high school students in the career opportunities that exist in the industrial production and utilization of polymeric materials. Thus, larger numbers of candidates will become available to fill the technical jobs that remain unfilled because of the lack of suitably prepared applicants.

CRITERIA FOR SELECTING PROPOSALS: Decisions are based primarily on the scientific and educational merit of the described activities and conformance with the objectives of the program. In the case of applications of substantially equal merit, program and geographic balance are additional decision criteria.

(STIA)

FEDERAL AGENCY: NATIONAL SCIENCE FOUNDATION

AUTHORIZATION: National Science Foundation Act of 1950, as amended (42 U.S.C. 1861-1875, Public Law 81-507); for Science Information Activities, Executive Order 10900, January 5, 1961, Section 4 (d) (11); Reoganization Plan No. 1 of 1977, as amended (5 U.S.C. App., 1977 Supp. I); and miscellaneous other laws codified at 42 U.S.C. 1876-1885d.

OBJECTIVES: To link performers of research with users of research; exchange scientific and technical information internationally and facilitate international cooperation; and serve S & T decisionmakers and the public by providing policy-oriented data and information. Objectives are pursued through International Cooperative Scientific Activities; programs for Industrial Science and Technological Innovation; Intergovernmental Science and Technology (described separately under 47.038). Policy Research and Analysis; and Science Resources Studies.

TYPES OF ASSISTANCE: Project Grants.

USES AND USE RESTRICTIONS: International programs provide funds for United States scholars to carry out studies abroad, to conduct research, to engage in joint research projects with foreign counterpart organizations and to support scientific conferences abroad. Travel must be by United States flag carriers. Awards to support cooperative scientific activities and travel in India, and Pakistan using local currencies are available. Other programs, in Industrial Science and Technological Innovation, Policy Research and Analysis, and Science Resources Studies, provide funds which may be used for paying costs necessary to conduct research or studies, such as salaries and wages, permanent equipment, expendable equipment and supplies, travel, publication costs, other direct costs and indirect costs. Primary responsibility for general supervision of all grant activities rests with the grantee institution; the project director or prinicpal investigator is responsible for the execution of the work program activities. For all programs, funds may not be used for purposes other than those specified in the proposal.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Public and private colleges and universities, nonprofit organizations, profit making organizations, including small businesses and professional societies. For International Cooperative Scientific Activities, Government scientific organizations are eligible. Also eligible are individuals on international travel. See program announcements listed below. For Industry/University Cooperative Research, the co-operating institutions must represent bona fide independent operations, as evidenced by absence of interlocking relationships. Collaboration should involve active partcipation by scientific or technical personnel at both the university and the industrial organization in aspects of proposed work.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: Proposals must be signed by the project director(s) or principal investigator(s) and official(s) authorized to commit the institution(s) in business and financial matters. A copy of foreign counterpart proposals should accompany U.S. proposals for international bilateral research projects. For individuals on international travel, a copy of an invitation to give a plenary lecture or organize a session should accompany application by official U.S. delegates or invitees.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: For international bilateral research programs, proposals should be developed between the two scientists for submission to the implementing agencies in both countries at the same time. Proposals must be cooperative in nature and be approved by implementing agencies in both countries. For other programs, none. For all programs, it is suggested that an initial inquiry be made before a proposal is submitted to determine whether a potential project qualifies for NSF support.

Application Procedure: For project support, submission of a formal proposal, signed by an official authorized to commit the institution or organization in financial affairs, fully documenting the planned activity and proposed amount of award. Industry/University Cooperative Research proposals should be directed to the NSF program supporting research in the field or subfield, but it must be identified on the cover page as an industry-university cooperative proposal. All programs are subject to the provisions of OMB Circular No. A-110.

Award Procedure: NSF staff members review and evaluate all proposals. To assist them, they usually obtain the advice of scientists who are specialists in the field covered by the proposal. Proposals are accepted in order of merit to the extent permitted by available funds. Notification of awards must be made to the designated State Central Information Reception Agency in accordance with Treasury Circular 1082.

Deadlines: Deadlines are specified in program announcements (see REGULATIONS, GUIDELINES, AND LITERATURE).

Range of Approval/Disapproval Time: Four to nine months.

Appeals: The project director or principal investigator may request, in writing, that the Foundation reconsider its action in declining any proposal application, renewal application, or continuing application.

Renewals: Proposals for renewal of awards, containing the same type of information as the original proposal, should be submitted 6 months before the expiration date of the original award. Renewals are treated in competition with pending proposals. Grants may be renewed one time provided that the cumulative duration does not exceed 5 years.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: For international bilateral research projects, funds are contributed from both countries. Each country assumes responsibility for support of its own participation in the project within its own territory. For other programs, institutions are required to share in the cost of each research project. This may be accomplished by a contribution to any cost element in the project, direct or indirect. Cost sharing does not apply to conferences and symposia, publication, travel, equipment, or logistic support.

Length and Time Phasing of Assistance: International programs normally up to 2 years. Other programs, generally one year but may run up to three years as necessary to complete. Assistance is disbursed by Letter-of-Credit or as required.

POST ASSISTANCE REQUIREMENTS:

Reports: Annual and final fiscal reports are required. Annual, semiannual, progress or final reports are also required for each grant. For travel grants, a travel report is required. Periodic reviews may be necessary in special cases. Quarterly Federal Cash Transaction Reports (SF 272) are required.

Audits: Under the total concept, audits will be made on an organization-wide basis (rather than grant-by-grant) under GAO guidelines, Standards for Audit for Government Organizations, Program Activities and Functions.

58.001 SECURITIES—INVESTIGATION OF COMPLAINTS AND SEC INFORMATION

(Complaints and Inquiries)

FEDERAL AGENCY: SECURITIES AND EXCHANGE COMMISSION

AUTHORIZATION: Securities Act of 1933; Public Law 73-22; 15 U.S.C. 77a et seq; 17 CFR 230, Securities Exchange Act of 1934; Public Law 73-291; 15 U.S.C. 78a to 78jj; 17 CFR 240, as amended by Public Law 92-29; and 94-29; Public Utility Holding Company Act of 1935; Public Law 74-333; 15 U.S.C. 79 to 79z-6; 17 CFR 250. Trust Indenture Act of 1939; Public Law 76-253; 15 U.S.C. 77aaa to 77 bbbb; 17 CFR 260. Investment Company Act of 1940; Public Law 76-768; 15 U.S.C. 80a-1 to 80a-52; 17 CFR 270. Investment Advisers Act of 1940; Public Law 76-768; 15 U.S.C. 80b-1 to 80b-21; 17 CFR 275. Chapter X, National Bankruptcy Act; Public Law 75-696; 11 U.S.C. 501-676; 17 CFR 281; Securities Investor Protection Act of 1970, Public Law 91-598; 15 U.S.C. 78aaa; 17 CFR 240-206d-1 et seq, as amended by Public Law 95-283.

OBJECTIVES: To represent investors in their dealings with the securities industry by processing complaints received from individual investors and insuring that registered entities process such complaints. To increase public knowledge of the functions of the S.E.C. To advise the Commission and staff about problems frequently encountered by investors and possible solutions. To represent the interests of individual investors in connection with Commission rule-making proceedings.

TYPES OF ASSISTANCE: Dissemination of Technical Information; Investigation of Complaints.

USES AND USE RESTRICTIONS: Investor complaints are an important source of information about possible securities laws violations and assist the Commission in its law enforcement and regulatory functions. Persons who believe they have been defrauded in their securities transactions should advise the Commission so that it may take appropriate action. The public is cautioned, however, that the Commission is not a collection agency; nor does it advise investors whether particular transactions about which they may have complained are violative of the Federal securities laws or seek recovery in their behalf, through court action or otherwise. However, such laws do provide important remedies to investors who may have been defrauded, and investors should consider seeking the advice of an attorney as to any recourse available to them if they believe they have been defrauded.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Anyone may seek information from or file a complaint with the Securities and Exchange Commission.

Beneficiary Eligibility: The Commission's actions are designed to protect not only those who seek its help directly, but all other similarly situated investors as well as the general public. Moreover, the Commission's public files contain financial and other information about several thousand companies, broker-dealers, investment companies, investment advisers, transfer agents, and banks. Any member of the public may examine such material at the Commission's headquarters office in Washington, DC, and its regional offices in New York, Chicago and Los Angeles, or he or she may obtain copies of the material by writing to the headquarters office (c/o Public Reference Branch). Also, investors who believe they have been defrauded, or believe that another party has violated the Federal securities laws are urged to present their complaint and/or information to the Commission for use in its enforcement and regulatory activities. Since a public action taken by the Commission does not necessarily result in any monetary benefits to investors, an aggrieved investor may find the information disclosed by the Commission in its actions helpful in any private action he or she may bring to recover his or her losses.

TYPES OF ASSISTANCE: Direct Payments for Specified Use.

USES AND USE RESTRICTIONS: The veteran may select a program of education to assist him or her in attaining an educational, professional, or vocational objective at any approved educational institution he or she chooses which will accept him or her as a student or trainee. A veteran who must complete high school training to qualify for higher education may elect to receive educational assistance without charge to his or her basic entitlement.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: The veteran must have served honorably on active duty for more than 180 days, any part of which occurred after January 31, 1955 and before January 1, 1977. A service person who has served on active duty for more than 180 days any part of which was before January 1, 1977, and who continues on active duty is also eligible. Upon completion of 18 continuous months of active duty, the maximum of 45 months of educational assistance will be granted, if the veteran is released under condition that satisfy his or her active duty obligation, otherwise assistance will be provided for at the rate of 1-1/2 months for each month of service. An initial period of active duty for training under section 511(d), title 10, U.S. Code, served on or after February 1, 1955 when subsequently followed by one year of active duty, may be included in determining entitlement. Also eligible for benefits are those persons who enter into service under the Delayed Entry Program between January 1, 1977 and January 1, 1978, and who contracted for this program with the Armed Forces prior to January 1, 1977.

Beneficiary Eligibility: Same as Applicant Eligibility.

Award Procedure: Awards are authorized at the regional office.

Deadlines: Generally, veterans have 10 years after release or discharge from service, but not later than December 31, 1989 to complete their education. The basic 10 year period may be extended for those veterans who were prevented from beginning or completing their chosen program of education because of a physical or mental disability not the result of their own wilful misconduct. Also, veterans who have entitlement remaining when their delimiting date is reached may use this entitlement as eligibility for an education loan providing certain conditions are met. Delimiting dates may also be extended for veterans who do not have a high school diploma, and for those who are found to be in need of vocational or job training because they are unskilled. Payment to affected veterans may be authorized for up to two years but not for training pursued after December 31, 1983. EXAMPLES OF FUNDED PROJECTS: The Council provides funding to the States for the conduct of comprehensive water and related land resources planning. The major components of the planning process are general studies, specialized studies, and plan formulation. Most of the States have developed or are developing State water plans; examples of component activities funded through this program are: 1. development of criteria and procedures to guide land and water use decisions impacting surface water; 2. development of program to promote irrigation conservation; 3. identification and evaluation of water management methods to accomplish the goal of reducing ground water overdrafts to reasonable levels; 4. development of program to evaluate water yield augmentation measures to meet long term States water commitments; 5. participation in Federal-State comprehensive water and related land resources planning.

CRITERIA FOR SELECTING PROPOSALS: Refer to FORMULA AND MATCHING REQUIREMENTS section above. The appropriation for the grant program is allocated to participants in two parts: on the basis of population, land area, and per capita income; on the basis of the Council's determination of need of a particular participant for a water resources planning program in comparison with the needs of all participants. In fiscal year 1981, all funds were awarded based on population, land area, per capita income and equal share. Due to Congressional budget action, this method reflects the Water Resources Council's efforts to award funds available in the most equitable manner possible.

As stated in the Clean Water Act, appropriated funds are prorated among the State and Interstate Water Pollution Control agencies on the basis of the extent of the water pollution problems in the respective states for an amount not less than its fiscal year 1971 grants. State allotment ratios are based on a count of pollution sources for each state compared to a count of pollution sources in the Nation. Interstate allotment ratios are based on the level of funding received in fiscal year 1973. Currently four factors are used in the formula: municipal dischargers, industrial dischargers, power generators and feed lots. The range of match varies greatly among states, reflecting their 1971 level of effort.

Length and Time Phasing of Assistance: One year; payments are approved quarterly and disbursed monthly.

POST ASSISTANCE REQUIREMENTS:

Reports: Annual expenditure reports; semiannual program evaluations; revised budget following reallocation of funds; other reports as Grant Agreement requires.

EXAMPLES OF FUNDED PROJECTS: 1. In Carbondale, PA, Senior Companions assigned to St. Joseph's Hospital serve elderly clients who will be discharged from this acute care hospital within a month. They form a one-to-one relationship with the clients in the hospital, help them make arrangements to go home, and serve them at home during recuperation. Clients are elderly persons who usually have no assistance from family. Senior Companions link them to needed community social services and arrange for friendly visiting from community volunteers when they are reassigned. 2. In Helena, MT, Senior Companions are helping discharged mental patients adjust to community living. One Senior Companion is assigned to three elderly clients who have a three-bedroom apartment. A blind Senior Companion in Oregon serves in a nursing home; he feels more secure in the nursing home as he knows his way about. One of his clients was an elderly man who had suffered a stroke. The client was depressed and would not try exercises. The SC talked to him frequently and got him out of his depression and into physical therapy treatment. The stroke victim recovered sufficiently to return home where another SC is now encouraging him to continue the exercises, eat properly and be interested in his surroundings. 4. In Waterloo, Iowa, 5 SC's are serving as members of hospice care teams who ease the emotional, physical and mental suffering of terminally ill elderly persons. One hospice care team served a man who had terminal cancer and helped his wife through the ordeal. The man died and his wife became a Senior Companion. 5. A Portuguese-speaking Senior Companion in Hawaii serves a lady in her 80's who is almost totally blind, lives alone, has a fiery temper and has alienated all of her children. She speaks only Portuguese. The SC has arranged for a chore worker, but the chore worker will only come when the SC is there. The SC pays no attention to the client's temper; she knows the client would be institutionalized without her.

CRITERIA FOR SELECTING PROPOSALS: 1. Equitable distribution between residents of rural and urban areas; 2. Opportunity for minority group participation; 3. Ability of applicant agency to legally receive and operate a Federal categorical grant; 4. Public or private nonprofit agency; 5. Evidence of availability of eligible volunteers; 6. TYPES OF ASSISTANCE: Formula Grants.

USES AND USE RESTRICTIONS: Grants are to be used by States in the development, implementation, or modification of a State energy conservation plan submitted to and approved by DOE. To be eligible for Federal assistance, each State energy conservation plan must contain the five program measures as required by the Energy Policy and Conservation Act; Public Law 94-163. The plan must also contain a proposed State energy conservation goal, consisting of a reduction, as a result of the implementation of the State energy conservation plan, of 5 percent or more in the total amount of energy consumed in the State for the year 1980 from projected energy consumption in the State for that year.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: All states plus the District of Columbia, the Virgin Islands, Puerto Rico, Trust Territories of the Pacific, American Samoa, Guam and Northern Mariana Islands are eligible.

Beneficiary Eligibility: The ultimate potential beneficiaries will be the people affected by the plan each State develops. This is anticipated to be the State's population.

Credentials/Documentation: States are required to submit a grant application and state plan to DOE by the last day of the calendar year. Governors (or their designated Plan review agencies) must be given an opportunity to review the State Plan pursuant to Part III, Attachment A of OMB Circular No. A-95 (revised). Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: The standard application forms required by OMB Circular No. A-102 as revised to meet the needs of this program and approved by OMB, must be used for this program. All forms are to be submitted to the appropriate DOE field office for approval.

Award Procedure: Planning: outline of proposed plans according to the Act and guidelines. Implementation: submit complete plan in accordance with guidelines. Grant procedures will be accomplished in accordance with Federal Government regulations. Notification of awards will be made to the designated State Central Information Reception Agency in accordance with Treasury Circular 1082.

Modifications to the State Energy Conservation plans were to be submitted by December 31, 1977 for fiscal year 1978, by April 30, 1979 for fiscal year 1979, by March 31, 1980 for fiscal year 1980, by January 31, 1981 for fiscal year 1981, and by February 28, 1982 for fiscal year 1982.

Range of Approval/Disapproval Time: The approval of State energy conservation plans and forms for implementation assistance will require approximately 45 calendar days.

Appeals: In the event the appropriate field official determines that a proposed State energy conservation plan does not meet the requirements of the Energy Policy and Conservation Act and the State Energy Conservation Plan Guidelines issued October 28, 1976, a letter of intent to disapprove must be sent to grantee. If the grantee wishes to appeal the decision, it must submit a request for a review panel with all supporting data and documentation to the appropriate DOE field official within six days after receipt of this notice. Upon receipt of the request, DOE establishes a review panel within six days consisting of one person from an alternate State government, one person from another Federal agency, and a third person to be selected by the appropriate field official. Within two working days after the panel has reviewed the plan and background material, a recommendation for approval or disapproval will be sent to the appropriate field official. A decision to the State will be written within one working day.
